

Dear Qi Chen,

Thank you so much for your help with my Mother's health over the last 8 - 9 years!

When we first consulted with you in early 2001 Mum was 71 years old. She had a tumour (Bladder Cancer) that was growing in the top the tube leading to the left kidney. After only 3 weeks on your treatment, Mum said she felt better than she had in 10 years ... and she happily committed to staying on your healing program for as long as it took to make her well again.

The Oncologist told us that according to their statistics, if she had all the treatments modern medicine could provide (surgery, chemo and radio therapy) ... 'the best they could offer her was 14 months to live.' She had the surgery to take the time bomb away (the tumour and the kidney), then went on to have chemo and radiation therapy over the next 12 months.

All of these were very big challenges, especially to her immune system and aggressive treatments for a 71 year old. Despite that, she sailed through those harsh treatments and we know the reason she handled it so well, with minimal side effects and virtually no complications was due to your program.

After the first three years of working with you, Mum elected to continue with your treatments on a 'maintenance' level. We looked at it like insurance. In 2006 Mum was given the 'all clear' from her Oncologist and in her last consultation he said to her ... 'Jean, I take my hat off to you, whatever you are doing, keep doing it.'

When Mum and Dad decided to move from Sydney in mid 2006, to the South Coast of NSW, we asked for your advice on how to proceed, given that they would now be 3 hours drive away. You suggested 6 monthly visits to keep an eye on things and this occurred for the first couple of years. At each visit you would give mum an acupuncture treatment and enough herbs for one month.

Then for various reasons, we missed one visit, so it was over 12 months before we got back to see you. Toward the end of this time Mum was feeling very tired and wasn't coping well with things again (for the first time in years). We tried working with the local TCM acupuncturist / herbalist (for 3 months), but Mum just didn't get any better. When we realised how long it had been since seeing you, we immediately made time to come to Sydney ... and within 2 weeks of being back on your herbs, she was back to her old self again!

Mum is 80 years old in September this year, she has had no sign of cancer for over 5 years, is well and leads a busy active life. She is probably one of only a handful of people in the world with that type of cancer to be still alive and well 9 years down the track! We truly believe this is due to your wonderful guidance and herbal medicine. Thank you Qi Chen, we will make sure she has her regular 6 monthly visits from here onward.

Kind regards,

Fiona Stephens
